Efficiency & Quality

Who We are :

Al-Ghalbi International Engineering & Contracting was founded in 1998, by national capacities with extensive management experience that works with a vision to enhance the company's role innational development, the company has more than 780 employees, Omanization reached 46% in the company, and national cadres occupy leadership positions in the administrative, professional, technical, financial and service departments of the company.

The company accomplished many projects during its path in the field of laying and maintaining oil and gas pipelines in various fields and concession areas in the Sultanate of Oman, as well it obtained certificates of excellence in performance, and certificates for doing business without time-consuming from its major strategic clients, such as Oman Petroleum Development Company (PDO), Occidental Oman(OXY) , OQ , Daleel Petroleum, ARA Petroleum, and CCED .

Vision:

Pioneer and First Choice in providing best services and solutions to all Oil & Gas Industry Requirements.

Mission:

To be the pioneer company in providing best services and solutions to off plot projects, delivery, pipeline integrity, maintenance and corrosion management.

Al Ghalbi... A Local Company with International Standards

Al-Ghalbi International Engineering & Contracting since its establishment in 1998, it has adopted the highest professional and ethical standards in all its operations and services implemented in the oil and gas fields, the company has gained high trust and good reputation from all customers, by providing innovative solutions and distinguished services that contributed in raising the efficiency of the productivity of its partners, and achieved their goals and vision in finding safe lines for the flow of oil and gas throughout the Sultanate of Oman.

The main pillar of the company's achievements and progress are were its staff, who are proficient and have extensive experience in various engineering, technical and administrative specialties, in addition to the core commitment to achieve work in record time with high quality, maintaining the safety of all the environments in which we operate and the safety of all workers are in the workplace.

The vision that the company launch of during the next stage is to be the leader in providing integrated engineering solutions in various productive sectors, relying on products of international quality that ensure sustainability, efficiency and protection of oil and gas flow lines.

Our aspirations are to keep pace with the future in terms of using the latest products and the best technology in the implementation of business, reinforcing the principle of digital transformation in communicating with customers and in drawing work paths in its various locations, out of our belief that technology innovations and products are the lung of successful economic businesses module . The principal stimulus in our career is that homeland worth fighting for it, and success comes only with diligence and perseverance, my message to the team and to the clients is that when we work hard we achieve excellence, but when we work as a team we make achievements that contribute to the development of the country.

Ali Suleym Salih Al Junaibi
Chairman

A handwritten signature in black ink, consisting of several loops and a final downward stroke.

Al Ghalbi .. Excellence is our goal.

Since launching in 1998, the Company relies on competence, experience and professionalism in completing projects in various locations of oil & gas fields' in the Sultanate. The company does not work on laying and maintenance of oil pipelines only, but it is also based on the principle of enhancing the efficiency of fuel energy transfer by making these channels operate with high efficiency for a long period of time.

Through the company qualified cadres and by means of modern technology we have been able to implement major projects and contribute to raise the performance of our customers and share with them the successes in projects of economic feasibility for the country in a way that achieves them a commercial benefit and makes their reputation a leader in the sector.

Al-Ghalbi International earned the confidence of major customers in the oil and gas sector, most notably the Oman Petroleum Development Company, Occidental Oman Company, Oman Oil Company and Dalil Petroleum Company, it also received praise and distinction certificates for its achievements in the projects of maintenance and laying oil pipelines in the Sultanate from various customers and institutions concerned with oil and gas sector policy.

One of the company's success pillars is that it works according to the regulations and standards issued by the relevant authorities supervising the work in the oil concession areas, and our most notable success are our employees in various administrative, technical and professional specializations who work with sincerity and dedication to achieve quality in work and excellence in performance.

During our journey, which began in 1998 the principle of achieving added value in our business was one of the most important strategy for growth and progress, in addition to the social responsibility that we have given great attention to, because we believe that the growth of societies is the basis of economy, trade and business prosperity, and that the duty of (Omanization) in leadership positions is the vision that inspired us from our wise leadership, and we have achieved positive results and high proportions in this national duty.

Dr. Salim Suleym Salih Al Junaibi
Vice Chairman

Integrity maintenance for pipeline including corrosion

Construction of mechanical civil electrical instrument for oil and gas flow line

Supply of specialist well service crew

Construction of tight liner HDPE activities

Rehabilitation of pipeline valve

Our major services:

Corrosion & Cossasco monitoring

- Oxifree
- Stopaq
- Epoxy coated sleeve

ديل للنفط ش.م.م.
DALEEL PETROLEUM L.L.C.

Exclusive services

Oxifree

Oxifree: Our innovative and environmentally safe polymeric resin encapsulation system, Oxifree TM198, has combined all the best characteristics of existing protective coatings into one unique solution, which is reusable and removable. Oxifree TM198 envelops the substrate in a liquid state, creating a passive protective shield within seconds as the material instantly solidifies on the substrate, while the inhibitors in our formula work actively to preserve your equipment and arrest any existing corrosion or contamination.

Stopaq

Stopaq Wrapping Band CZHT

STOPAQ Wrapping band CZHT is suitable for corrosion prevention of high operating temperature pipelines. The CZHT coating in wrap form creates a monolithic coating when applied to the steel and / or PP factory coated pipeline surface.

Epoxy coated sleeve

The epoxy grout compound forms an excellent bond at both steel interfaces, providing both axial and circumferential support. The combination of the steel outer shell and the epoxy grout provides significant bulging restraint, thus removing or significantly reducing the failure mechanism of defects.

HDPE

HDPE : The SURE-Liner system is an internal pipe lining process that involves the insertion of a tight fit HDPE plastic liner pipe inside the steel pipe, thereby taking advantage of the mechanical strength of the steel pipe with the combined corrosion and abrasion protection of the liner. The HDPE liner pipe is manufactured to ASTM and ISO industry standards for PE4710 and PE100. To obtain a tight fit

2005 - 1998
